DUNGEONS & DRAGONS: ARCANE COMPOSITRY

COMBAT & ARCANE QUICK REFERENCE

ATTACK CHAIN CORE LOOP

1. Roll the attack against AC. If it would hit, the defender may take the hit or spend Guard to Dodge, Parry, or Block.

2. If damage lands, gain 1 Chain Momentum (+1 to later Chain attacks, maximum +3) and continue until you reach your Chain Length.

3. After taking melee damage in that Chain, the defender normally cannot Dodge later attacks unless they create distance.

4. A Perfect Parry, escaping Perfect Dodge, full Block, Counter-attack, or other interruption can end the Chain. The final attack is the Finisher.

5. You may stop voluntarily and take Defensive Posture. Missing gives a Recovery choice rather than automatic dead time.

ACTIVE DEFENSE

DODGE	Spend 1 Guard. Roll d20 + DEX + proficiency if applicable vs. attack roll. Beat by 5+ = Perfect Dodge; move 5 ft and end Chain if out of reach.
PARRY	Spend 1 Guard. Roll d20 + STR or DEX + proficiency vs. attack roll. Beat by 5+ = Perfect Parry; Chain ends. Beat by 10+ may enable a free/masterful counter if your rules allow.
BLOCK	Spend 1 Guard. The attack connects but reduce damage by your Block value. If damage becomes 0, the Chain ends. A damaging Block still resets Momentum Dice.
GUARD	Suggested Guard = 2 + proficiency bonus. At 0 Guard you are Broken: no active Dodge, Parry, Block, Counter-attack, or Finisher interruption until Guard refreshes.

MISS RECOVERY & COUNTER-ATTACKS

RECOVER	End safely; regain 1 Guard.
PRESS	Continue at -2; defender gets +2 to defense.
REPOSITION	Move 5 ft without provoking; Chain ends.
FEINT	End Chain; enemy loses 1 Guard.
WILD RECOVERY	Spend 1 Guard to reroll; second miss = Exposed.

Counter-attacks are usually available after a severe miss, natural 1, Perfect Parry, or full Block. Suggested cost: 2 Guard. If the counter lands, the original Chain ends and control may reverse.

MOMENTUM DICE & STASIS

d4	**Build only**	**-**
d6	**Break**	**5-6**
d8	**Topple**	**7-8**
d10	**Daze**	**9-10**
d12	**Launch / Smash**	**11-12**

After a successful hit at d6+, either build one step or spend. Damage Spend: add the current die to the hit. Stasis Spend: roll the current die against its threshold. Any spend resets to d4.

Taking direct hostile damage also resets to d4. A miss, successful defense, or 0-damage Block

STASIS EFFECTS

BREAK (d6): until target's next turn, melee attacks have advantage; each qualifying hit deals +1d6 bludgeoning/force.

TOPPLE (d8): target kneels, melee attacks have advantage, cannot Dodge or Parry, may Block. At next turn it stands; speed is halved that turn.

DAZE (d10): cannot Parry or Block until next turn; may Dodge. At start of turn, WIS save or cannot attack and speed is halved.

LAUNCH / SMASH (d12): Launch adds 2d6 and moves 15 ft; collisions may add 1d12. Smash adds 3d6, speed 0, and attacks have advantage until recovery.

ARCANE FORMULAS

FINAL MANA

Core Mana + Components + Range + Area + Duration + Effect.

DAMAGE DICE

Potency + 2 + floor(Potency / 3). Single target d8; risky/heavy d10; area d6; persistent d4.

ARCANE ATTACK

d20 + proficiency bonus + Invocation Modifier.

SAVE DC

8 + proficiency bonus + Invocation Modifier.

STASIS SAVE DC

CIRCUIT STABILITY, COUNTER-COMPOSITRY & TABLE NOTES

CIRCUIT STABILITY

Check: d20 + proficiency + Invocation Modifier. DC = 10 + floor(Potency / 2) + Additional Components + floor(Damage Taken / 10). On failure choose Ground, Force Closure, Backwash, or Collapse.

COUNTER-COMPOSITRY

Use an Invocation Check against the attacker's Arcane Save DC. A strongly logical material/aspect counter can gain about +2. Successful counters may cancel, redirect, or transform the magic into a third battlefield effect.
